

created on May 6, 1935 with many helpers using government forms with private material built for rural and small town inhabitants the most sanitary and useful outhouses to dot the prairie landscape; and whereas, this national project was initiated and executed in the name of health, it did much to improve the comfort and well-being of rural America. Now, therefore, be it resolved by the members of the 89th Legislature of Nebraska, First Session, that the Legislature honors the 50th anniversary of the WPA and its dedication to the construction of the beautiful backyard backhouse. Thank you, Mr. President.

PRESIDENT: Thank you for your eloquence, Senator Barrett. The Chair recognizes Senator Chronister.

SENATOR CHRONISTER: Mr. Chairman and members, I think we should all give the senator from Plum Creek, better known as Lexington now, a lot of credit for all the research he has dug into to promote this project. By the way, Senator, I think the citizens of Hooper, Nebraska was say "Hooper" and not "Hooper." Thank you.

PRESIDENT: The Chair recognizes one of the members, I think he was a plumber, Senator Lynch.

SENATOR LYNCH: Mr. President, members, I can't avoid standing up on an opportunity like this. I can't tell you how I was overwhelmed with emotion when he read that outstanding statement. I think if it is possible, I'm not sure about the rules because I'm only a freshman, can we amend this resolution to include Senator Pappas's bill that provides for two rest rooms in each gas station? It might be inappropriate. I'm not quite sure. Can we do that? I'll yield to the Chair if it's not possible to do that.

PRESIDENT: Is there further discussion on...Senator Barrett, you may close.

SENATOR BARRETT: Thank you, Mr. President. On this important anniversary day of May 6, I simply wanted to call the body's attention to this issue and make the body privy, I repeat privy to this very interesting bit of trivia. At the beginning of one of the final weeks of this session and more specially a typical Monday morning, I thought it might be an effort to help awaken the body so that we then can proceed to some of the more important issues of the day.
